

Ocean Heavy Duty Fenders is a series of superior quality boat fenders that offer excellent protection for any different boat. They're made of Plastisol PVC with rotation moulding procedure. They are also UV resistant for their protection from sunlight. They are **one-piece made**, which means that **no parts are attached together** to form the finalized fender, and have consistent wall thickness as well.

H Series are **heavy duty** boat fenders in which the **rib-reinforced rock solid ropeholds** in the two sides of the fender are made in such way, in order to provide extra strength and durability for the fender. A versatile fender for the most adverse conditions. Suitable for any use and any kind of boat from 10-60ft, the Ocean Heavy Duty fender "fends" proudly.

- Inflation pressure: 2.1lbs/0,15bar at 68°F/20°C
- Material : Plastisol PVC
- Production process: Single procedure Rotational moulding

Model	Colour	Code	Dimensions		Eye Diameter	Volume per products (lt)	Weight (kg)	Boat Size (ft/m)
